

CSK40PP

Technical sheet of CSK40PP

What are the Benefits of choosing CSK40PP bearings?

- **Gearbox bearings (needle roller/tapered/ball bearings):** Withstand shifting shocks and high-speed rotation in minimal space, ensuring transmission efficiency and smooth shifting.
- **Engine bearings:** High temperature resistant, wear-resistant, and low-friction, adaptable to high-speed reciprocating motion, extending engine life.
- **Steering/water pump bearings:** High rigidity and excellent sealing ensure precise steering and reliable cooling system.
- **Motor bearings (new energy):** Ultra-high speed, insulating against electrolytic corrosion, and low friction, effectively increasing driving range.

Type :	Clutch release bearings	
Model :	CSK40PP	
Main demensions :	40 mm × 80 mm × 22 mm	Bore Dia × Outside Dia × Width Dia
M kg:	0.5	Mass
d mm:	40	inner ring diameter
D mm:	80	Outer ring diameter
B(T) mm:	22	Overall Width

Detailed parameters and installation dimensions:

Part Number: CSK40PP Stieber

Technical description (PP): PP=Features A Keyway On Both The Inner And Outer Race. The Recommended Installation Tolerances Are H6 On The Shaft And H6 In A Rigid Housing.

Bearing Type: Clutch Bearing

Size(metric): Inner (d): 40,00 mm X Outer (D): 80,00 mm X Width (B): 22,00 mm or Size: 40,00 mm * 80,00 mm * 22,00 mm

Original Equipment Manufacture(OEM NO.): CSK40PP

What are the applications of the CSK40PP bearing?

- **Wheel system:** Used for drive/driven wheels. Integrated design, maintenance-free, high rigidity, supports the vehicle body and ensures smooth rotation.
- **Transmission:** Used for shafts, gears, and shifting mechanisms. Compact size, high load capacity, withstands shifting shocks and high-speed operation.
- **Engine:** Used for crankshaft, connecting rods, and water pump. High temperature resistance, low friction, suitable for high-speed reciprocating motion.
- **Steering system:** Used for steering column and steering knuckle. High rigidity, sensitive operation, ensures precise handling.
- **New energy motor:** Used for drive motors. Ultra-high speed, insulation to prevent electrolytic corrosion, increases range.
